Office Action Summary	Application No. 10/647,524	Applicant(s) SAUCIER ET AL.	
	Examiner Jessica Laux	Art Unit 3635	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 May 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claim 3 has been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 3, 14, 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #1,660,275 to RUSSELL in view of JP5-125848 and further in view of YABE et al (20040016312).

RUSSELL discloses the use of a concealed storage system including an encased chamber (being the pen, page 2 lines 60-64) having an opening (not labeled, page 2 lines 60-64); a support frame (1,3,4,7) fixed within the chamber (being the pen); a liftable frame (F) having a deck (8); and a lifting mechanism (27-29) for raising and lowering the system through controlled use of a suitable power source.

RUSSELL discloses the basic claimed system except for the use of a top and a bottom deck, and except for explicitly detailing that his power source is specifically a motor. With regards to the power system, although RUSSELL discloses the use of a

Art Unit: 3635

lifting mechanism that is operable by any power source, he is not specific as to the type of power used. JP5-125848; however, teaches that it is known in the art to provide a concealed storage system with top (16) and bottom (18) deck components operable through the use of a motor (the English abstract). Hence, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the system of RUSSELL with the additional deck component of JP5-125848 in order to further conceal the system from external conditions.

Further RUSSELL does not expressly disclose that the lifting mechanism includes a rolling ball screw nut, but rather discloses a nut assembly (page 2, lines 42-46). However, such rolling ball screw nut systems are well known and commonly used for lifting/moving operations (reference for example publication 20040016312). Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the nut/screw assembly of RUSSELL to have a rolling ball screw nut as such assemblies provide a more smooth and accurate moving operation.

Allowable Subject Matter

Claims 4-6, 9-11 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica Laux whose telephone number is 571-272-8228. The examiner can normally be reached on Monday thru Friday, 6:30am to 2:30pm (est).
